

# MILESTONE REPORT 2025

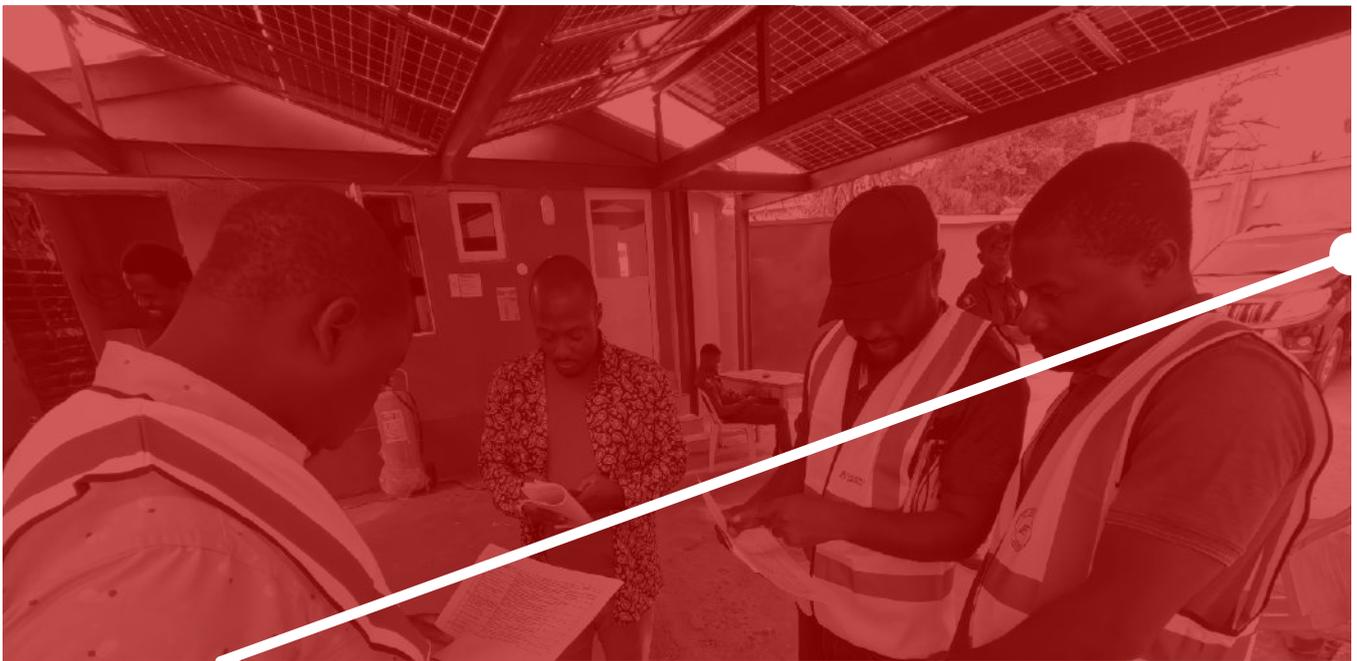

Driving Sustainable Mobility,  
Building Capacity and Powering Nigeria's  
Clean Transportation Future

# Introduction

We are proud to reflect on the significant strides **EV World Africa** has made in advancing electric mobility, clean transportation, and capacity building across Nigeria. Our work continues to be driven by a commitment to sustainable innovation, strategic partnerships, and human capital development.

This report highlights key achievements in 2025, demonstrating our collective impact and laying the groundwork for even greater progress in the months ahead.

# Infrastructure Deployment

We successfully deployed over 100 AC and DC chargers across homes, workplaces, and commercial locations... supporting daily commuting, fleet operations, and public charging needs, while expanding reliable access to electric vehicle charging infrastructure.

# Infrastructure Deployment

# Capacity Building & Awareness

## ◆ Established the Nigerian EV Youth & Women Community

A growing grassroots community now comprising 72 registrant and 60+ members admitted to the community, providing access to resources, opportunities, and mentorship in the EV sector.

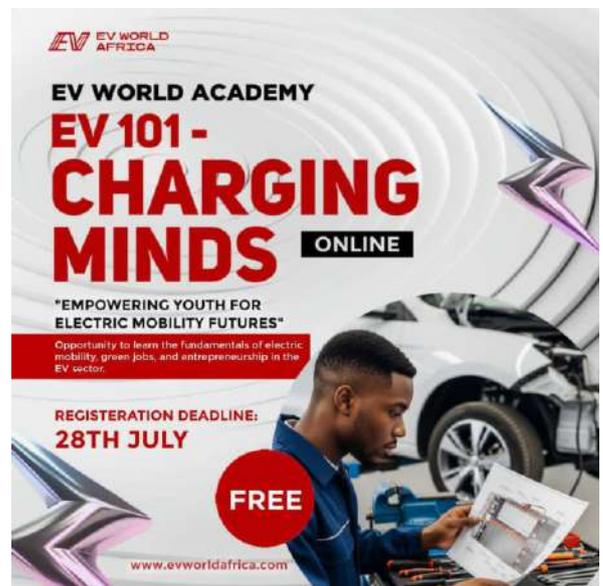

## ◆ 2 Impactful Virtual Webinars Hosted:

Women in E-Mobility: “Accelerating Women’s Participation in E-Mobility: Finance, Policy, Technology and Opportunities.” With over 100 women and youth in attendance.

Powering Nigeria’s Future: Youth Employability in Electric Mobility.

Together, these events reached 400+ participants across Nigeria and beyond. And 135 participants.

## ◆ Launched the EV World Africa Training Academy

We launched the EV World Africa Training Academy to build practical capacity in fleet electrification, EV charging systems, and overall electric vehicle operations.

The program also integrated interns, who actively participated in the training and successfully graduated, contributing to a growing pipeline of skilled EV professionals across Africa.

# Consulting & Advisory

1

## **Strategic Consultancy for a Financial Institution**

Delivered technical and market insights to inform investment in e-mobility.

2

## **Comprehensive Technical Due Diligence Assignments**

Executed on behalf of investors and clean energy financiers to support informed funding decisions in EV fleet deployment and charging infrastructure.

3

## **Technical Consulting Engagements for E-Mobility Stakeholders**

Provided expert due diligence, infrastructure assessment, and fleet transition advisory to three different organizations in Nigeria's emerging EV landscape.

# Thought Leadership & Publications

We published 4 influential articles and policy briefs to shape the conversation on Nigeria's clean mobility future:

**Navigating the Green Frontier: Challenges Faced by Stakeholders in Electric Vehicle (2, 3, and 4-Wheeler) Importation via Nigeria Customs Service** UNCATEGORIZED

These publications have been widely shared and referenced across social media, partner networks, and industry events.

# Strategic Due Diligence for Sustainable EV Growth

Behind every successful EV rollout is rigorous evaluation. Our team has been actively conducting comprehensive due diligence within the electric vehicle sector—assessing systems, strategies, and execution models to ensure alignment with global best practices and local realities. This is how we help shape a smarter, more resilient EV future for Africa.

# Strategic Due Diligence for Sustainable EV Growth

EV World Africa remains committed to building Nigeria's e-mobility ecosystem through practical action, knowledge sharing, and collaborative leadership.
